Consumer Functional Interface

Consumer FI: Accepts argument, but don't return anything.

Prototype:
```
Interface Consumer<T>{
        Public void accept(T t);
}
```

Sample Program:

```
Import java.util.function.*;

Public class TestConsumer{
        Public static void main(String[] args){
                Consumer<String> c = s->System.out.println(s);
                c.accept("Hi");
                c.accept("Hello");
}
}
Output: Hi
        Hello
```
